CONTEXT

GSSC (Green Small Smart Cities) is a project funded by the European Union, under the COSME programme, call Cluster go International.

GSSC project aims to disseminate the use of sustainable technological solutions from Europe to the less developed regions of the world, by supporting the internationalization strategy of European SMEs that have innovative solutions, complementary technologies and a shared vision to build a better world.

To address this objective, GSSC consortium has analysed diverse Asian countries and has selected Vietnam following different indicators. Da Nang City is where the second exploratory mission took place in September.

In this session, GSSC project will present some organisations and companies based in **Da Nang City** that were part of the second exploratory mission, they will present their solutions and projects in order to be the first step to tighten relations between European SMEs and the Vietnam market.
