

March 24–26, 2026
Messe München

A high-performance material like no other. Discover ceramics.

ceramitec.com

What is ceramitec?

ceramitec is the leading international trade fair for the high-performance material ceramics. As a central platform, it combines traditional and technical ceramics, covers the entire value chain from raw material suppliers to equipment and contract manufacturers, and impresses the user industries.

Under the motto "A high-performance material like no other. Discover ceramics." ceramitec makes the social and industrial relevance of ceramics visible and tangible. The focus is on innovations that shape the future – efficient, sustainable, and across all sectors.

Focus on technical ceramics

Technical ceramics is a rapidly growing sector of the ceramics industry. This is also reflected in the development of ceramitec. More and more exhibitors are being represented at the trade fair in Munich. The top players in high-performance ceramics from all over the world will be there. Find out now what opportunities ceramitec offers as a meeting place for leading manufacturers, users and scientists.

The Technical Ceramics exhibition area at ceramitec will offer solutions and products for the following user industries:

- Medical technology
- Electronics
- Industrial applications
- Lifestyle and leisure
- Battery and energy storage systems
- Renewable energies
- Automotive
- Aerospace

Would you like to know which companies are exhibiting at ceramitec 2026?

You can find an overview at: exhibitors.ceramitec.com

Our services. Your benefits.

■ Impetus for your industry.

Ceramics is not a niche material – it is a material of the future with strategic relevance for value creation and sustainability.

■ Technology meets material expertise.

Whether it's the energy transition, the electronics industry or medical technology – ceramics provides smart answers to the challenges of tomorrow.

■ Ceramics inspires. Ceramic moves.

And it can be used where other materials reach their limits.

■ Discover ceramics.

Experience how this material opens up new horizons.

■ Show what ceramics can do. And what you can do.

Position your company as an innovation driver in the industry – at the world's only trade fair that brings ceramics to life as the high-performance material of the future.

■ A material with a future. A trade fair with relevance.

Take an active part in shaping how ceramics will change the markets of tomorrow – and network with the players who are driving them forward.

■ Valuable. Changeable. Pioneering.

The future is ceramic. And it starts at ceramitec.

Electronics

Apple / BSH Hausgeräte / Carl Zeiss SMT / Huawei / Kyocera / Rogers Germany

Renewable energy

AMG Lithium / Hitachi Energy / Redoxblox / Siemens Energy / Wärtsilä Moss

Medical technology

Dentsply Sirona / Erbe / Institut Straumann / Medtronic / Siemens Healthineers

ceramitec from the exhibitors' point of view:

“ceramitec has been the most important trade fair for us since INMATEC began 25 years ago – there is simply no alternative. The idea for INMATEC originated here in 1997 and we have generated new ideas for advancing our products at every ceramitec since. This is due to the high caliber of visitors. And this is why we are also celebrating our 25th anniversary here together with our customers, suppliers and cooperation partners – because ceramitec always brings everyone together. For us, ceramitec is an industry highlight, one that will at last be held every two years instead of the previous three-year interval.”

Dr. Moritz von Witzleben

Managing Director, Inmatec Technologies

“Taking part in ceramitec is important for our company as a leading provider of 3D printing processes for ceramics. As Europe's leading trade fair in this sector, ceramitec offers a platform to showcase our innovative solutions and connect with industry leaders. Participating in ceramitec is of historic importance for our company. It remains an indispensable event for us, and we have already committed to participating in the 2026 edition.”

Richard Gaignon

CEO, 3D Ceram
