

EUDR DDS – Units of Measure Guidance for Economic Operators

This document provides guidance on the correct use of Units of Measure (UoM) when registering data in 'Box 6' during the DDS submission in the EUDR system. The rules differ depending on the selected Activity type in 'Box 2' and apply to both UI and API submissions.

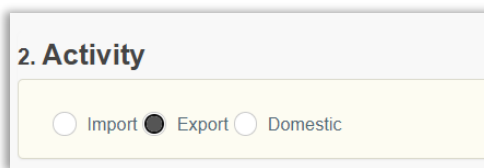

1. DDS with Activity: Import or Export

Preconditions: Activity selected = Import OR Export

2. Activity

☒ Import ☐ Export ☐ Domestic

2. Activity

☐ Import ☒ Export ☐ Domestic

Mandatory Fields

- Net Mass (Kg): Always required for Import / Export activity.

Supplementary Unit Type

- Read-only and automatically preselected if applicable for the HS code.

- Please see the Commodity Code Dependent Supplementary Unit List in Appendix I of this document. The same supplementary units are also applicable for sub-codes of the Commodity Codes listed in Appendix I (example: the supplementary unit for HS Code 4011 also applies to HS Code 4011 10).

- Please note that HS code matching is performed on the first 4 HS code digits (except for the 6-digit HS codes in the list where an exact match is required)

- **Examples:**

HS Code selected	Supplementary code applied
47	N/A
4701	KSD (kg 90% sdt)
4410	MTQ (m ³)
441011	MTQ (m ³)
010221	NAR (p/st)

Important note: The extension of applicability of supplementary units to the 6-digit sub-headings will be enabled in the next release. Currently in EUDR (release 7.3.1) the rule applies to the 4-digit codes, except for 010221 and 010229 where there is corresponding no 4-digit code.

Supplementary Units

- Mandatory only if the commodity code appears in Appendix I of this document.
- If not applicable, no supplementary unit type or value is allowed, see Annex II point 2, 3rd sentence of the EUDR.

2. DDS with Activity: Domestic or Trade

Preconditions: Activity selected = Domestic OR Trade

The image shows two side-by-side screenshots of a form titled "2. Activity".

The left screenshot shows a single radio button labeled "Trade" which is selected (filled with a black dot).

The right screenshot shows three radio buttons: "Import", "Export", and "Domestic". The "Domestic" radio button is selected (filled with a black dot), while "Import" and "Export" are unselected (empty circles).

Valid Units of Measure Combinations

1. Net Mass and Percentage estimate or deviation

- Allowed values for Percentage estimate or deviation: 0 – 25.

2. Supplementary unit type and quantity

- Code list available in Annex Appendix II of this document.
- Display Text from Annex Appendix II of this document appears in the 'Type' field.
- Display on Hover text appears in the dropdown list.

3. Net Mass with Percentage estimate or deviation AND supplementary unit type and quantity

- Same rules apply as above for Supplementary Unit Type and value, and for the Percentage estimate or deviation.

Appendix I – Commodity Code Dependent Supplementary Unit List for ‘Import’ and ‘Export’

HS Code	Supplementary Unit Type	Display Text	Display on Hover
010221	NAR	NAR (p/st)	Number of items
010229	NAR	NAR (p/st)	Number of items
4011	NAR	NAR (p/st)	Number of items
4013	NAR	NAR (p/st)	Number of items
4104	NAR	NAR (p/st)	Number of items
4403	MTQ	MTQ (m ³)	Cubic metre
4406	MTQ	MTQ (m ³)	Cubic metre
4408	MTQ	MTQ (m ³)	Cubic metre
4410	MTQ	MTQ (m ³)	Cubic metre
4411	MTQ	MTQ (m ³)	Cubic metre
4412	MTQ	MTQ (m ³)	Cubic metre
4413	MTQ	MTQ (m ³)	Cubic metre
4701	KSD	KSD (kg 90% sdt)	Kilogram of substance 90% dry
4702	KSD	KSD (kg 90% sdt)	Kilogram of substance 90% dry
4704	KSD	KSD (kg 90% sdt)	Kilogram of substance 90% dry
4705	KSD	KSD (kg 90% sdt)	Kilogram of substance 90% dry

Appendix II – Selectable Supplementary Unit Codes List for ‘Domestic’ and ‘Trade’

Measurement Unit Type	Display Text	Display on Hover
KSD	KSD (kg 90% sdt)	Kilogram of substance 90% dry
MTK	MTK (m ²)	Square metre
MTQ	MTQ (m ³)	Cubic metre
MTR	MTR (m)	Metre
NAR	NAR (p/st)	Number of items
NPR	NPR (pa)	Number of pairs
