Getting to Zagreb

The city of Zagreb, the capital of Croatia, on the historic and political threshold between East and West, illustrates the continental and Mediterranean spirit of the nation it spearheads.

Zagreb is a safe city whose doors are always open; a city with a tumultuous history teeming with interesting personalities, a city that warmly invites all who wish to get to know it and a city that will surely fulfill your expectations.

Airport

The closest airport to Zagreb is **Franjo Tuđman Airport**.

More information: <https://www.zagreb-airport.hr/en>

By Shuttle from Airport to Zagreb Central Bus Terminal

The scheduled airport shuttle, "Pleso prijevoz" operates between the Airport and the Zagreb Central Bus Terminal. This shuttle service is organized in such a way that it follows the airport timetable.

All additional information regarding the airport shuttle timetable, prices, and tickets you can find on the website: <https://plesoprijevoz.hr/en/zagreb-croatia/>

The taxi stand for arriving passengers is available at the Passenger Terminal, near the Ground Floor, Arrivals level of the Terminal. Next to cash, Taxi service providers at ZAG accept various types of payments, such as credit cards and digital wallet platforms online payment systems. Also, you can use taxi apps: Uber, Bolt, etc. More information: <https://www.zagreb-airport.hr/en/passengers/to-from-the-airport/by-taxi-rent-a-car/90>

Zagreb electrical outlet and plug types

Zagreb uses power outlets and plugs of types C & F. Look at the pictures below to see what these plugs and power sockets look like:

The standard European plug. Commonly used in Europe, South America and Asia, but also in quite a few other countries. Plugs of type E and F will also fit in a type C outlet.

Used in almost all European countries and Russia. Also known as the Schuko plug. Plugs of type C and E will also fit in a type F socket.

Electricity in Zagreb - voltage and frequency

All power sockets in Zagreb provide a standard voltage of 230V with a standard frequency of 50Hz.

You can use all your equipment in Zagreb if the outlet voltage in your own country is between 220V-240V. This is the case in most of Europe, Australia, the United Kingdom and most countries in Africa and Asia. If the standard voltage in your country is in the range of 100V-127V (which is most common in the US, Canada and countries in South America) you might need a voltage converter in Zagreb.

The standard frequency in Zagreb is 50Hz. If this frequency differs from the frequency used in your home country, please use caution when plugging in your devices. Please note we regularly check our electricity information with the [International Electrotechnical Committee \(IEC\)](https://www.iec.ch/)
