DOCUMENT MANAGEMENT 4.0

Document management is an Industry 4.0 tool, which imply the information disruption, and it's immediately displayed thanks to Augmented Reality technology.

In each phase of the PLM, we make, keep, process and consult a lot of information. Document management centralizes and organizes all this information to get easily to it in standard formats.

“Innovation is a necessity”

“Design Navigation Assistance”

Definitively, Document Management 4.0, is the set of techniques to manage the entire information flow regarding a project, applying new technologies which allow to improve the performance, efficiency and functionality.

“The only constant in the technology industry is change.”

During a concurrent and collaborative process, the correct use and organization of the information is of vital importance, as it results in greater efficiency in work processes.

Mitica Technology offers the solution of the future: MiRA Realidad Aumentada.

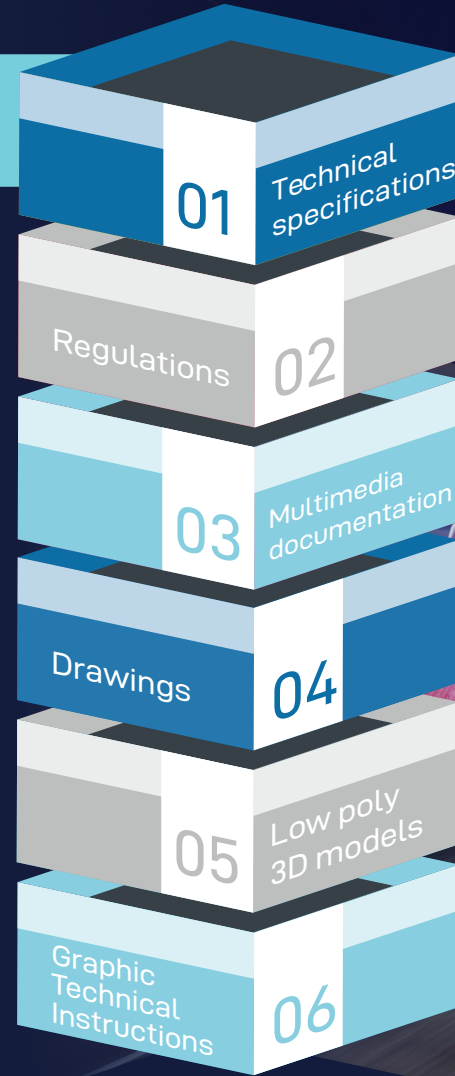

MIRA
AUGMENTED REALITY

“Every functionality,
in the most complete,
accessible and
flexible way”

Therefore, the use of document management tools, such as MiRA, allows streamline and make more effective the workflow, by immediately accessing to all the updated project information: maintenance documentation, 3D models, drawings, technical specifications.

MiRA is a disruptive and multiplatform Document management 4.0 tool. Thanks to Augmented Reality we can visualize all the information concerning to a project, classified and organized through an arborescence diagram: documents, technical specifications, drawings, 3D models, images and videos.

MIRA INDUSTRIAL

COMPATIBILITIES

Document integration with other engineering softwares as Catia, Nx and other design softwares.

ADVANTAGES

- Guarantee divulgation and real-time reception of the information last version.
- Abolish paper waste.
- Collaborate with the different stakeholders of a process.
- Increase information, without increasing memory storage capacity.
- Information Accessibility, generation and distribution from each work place.
- Visualize processes, just focusing on a specific mark.
- Validate processes only by means of the application.
- Security, avoiding document copies.
- Everywhere Access from any device.

DOCUMENT
STANDART

*“Reliability, availability,
maintainability and safety”*

MiRA Realidad Aumentada is a tool to access to all the information project, immediatly, thanks to a marker.

This associate information will be visualized by the differents employees according to a role hierarchy. The selected employee, will generate a new project in the platform and will be able to add content, to be seen on every device.

MIRA
AUGMENTED REALITY

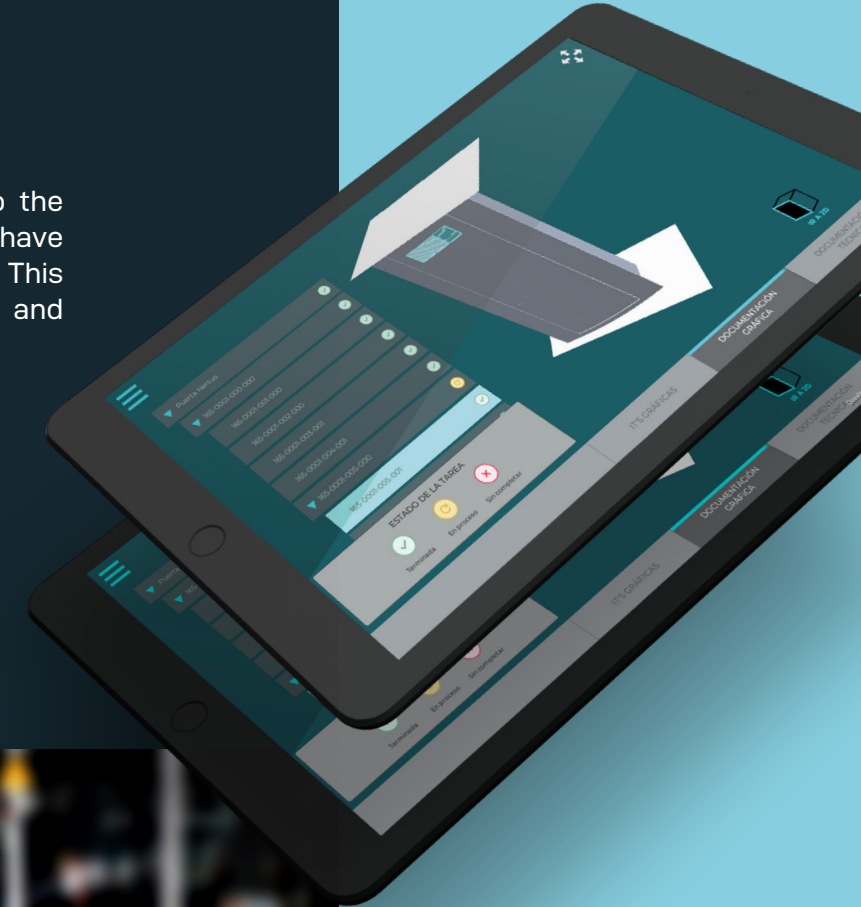

From marker, you will be able to access to the project arborescence diagram, which you have previously generated in the MiRA Platform. This diagram contents all project assemblies and parts, with its associated content.
